## ADVANTAGES COMPARED TO OTHER COMPOSITE WOODS

- ✓ Made from 95% recycled material
- ✓ Guaranteed for 20 years without fading
- ✓ Unique natural decors and textures
- ✓ PVC and formaldehyde free
- ✓ Stain resistant
- ✓ Very high dimensional stability
- ✓ Easy to install and remove

## A HIGHLY DURABLE COMPOSITE WOOD

Fiberdeck® is committed to the durability of its products and guarantees its decking, cladding and fencing range for 10 to 20 years (commercial, professional and public/residential use) against splintering and structural damage due to fungus, wood-eating insects or termites, as well as the colour and stain resistance of the products over the same period.

## ULTRA LOW MAINTENANCE

Simple cleaning with high-pressure water (120 bar) is sufficient to clean your Fiberdeck® deck. Thanks to the polyethylene protective layer, Fiberdeck® decking will not turn grey or stain. The natural colour, look and feel of the wood will persist in the most extreme climates and temperatures. The aesthetics of the pattern are preserved over several decades while generating significant maintenance savings.

## AND MADE WITH 95% RECYCLED WASTE

Fiberdeck® decking is made from 95% recycled wood waste and polymers. Wood is the main component with nearly 60% of the volume, and comes from FSC-certified sawdust from the manufacturing industry. The polymers come from recycled plastic bottles. We recycle 40 million plastic bottles in our products every year. Thousands of tons of plastic waste are thus recycled to manufacture a product with superior performance to natural wood.

# DECKING COMPOSITE WOOD

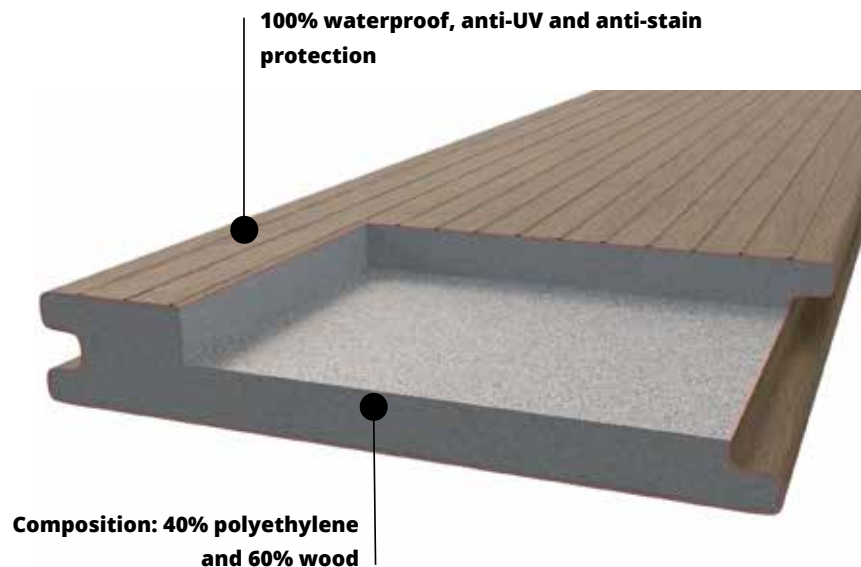

# COMPOSITE WOOD WITH OUTSTANDING PERFORMANCE

## CO-EXTRUSION, A CUTTING-EDGE TECHNOLOGY

Co-extrusion is a new technology that is disrupting the composite wood market. The recurring problems of staining and fading of first-generation mono-extruded boards have led us to use co-extrusion technology. It consists of applying a very thin, molten polyethylene film on the composite wood. This waterproof film protects the wood from any moisture issues and stabilises the material. Expansion is also reduced to a minimum. Our 100% co-extruded Fiberdeck® decking profiles offer much better quality than any other product on the market.

## 20-YEAR GUARANTEE WITHOUT FADING

With a wealth of experience in this new technology and several million square metres marketed to date in a wide range of climates, we can guarantee our products for up to 20 years without any visible fading.

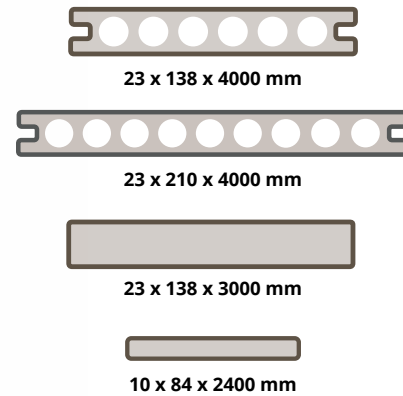

## A REVERSIBLE PROFILE WITH A CHOICE OF TWO DECORS

BROOKLYN boards offer a choice of smooth and textured wood grain in 4 multi-chromatic colours. The co-extrusion protective layer on both sides guarantees very low expansion of the boards and durable colour over time. The finishing boards associated with this range can be adapted to all configurations. Removable boards.

## A BOARD WITH SCULPTED CHARACTER

The new HERITAGE board has a unique design that perfectly imitates exotic wood. The pores of the wood are reproduced down to the smallest detail. The surface of the board has irregularities that catch the light and give rhythm. This is an “adze” look, which corresponds to the traditional carpenter’s tool for smoothing out a piece of wood. This board has a new co-extrusion coating that is highly resistant to abrasion. The protective layer is hard and limits scratches. This layer is present on all 4 sides of the board.

## SMOOTH OR REEDED, A STRIKING WOOD DECOR !

MANHATTAN boards are available with a choice of smooth or reeded faces in 4 multi-chromatic colours. The colours are guaranteed for 20 years and the decking requires very low maintenance. The grooves catch the light to give relief to the decking. The finishing boards, combined with this range, allow all types of finishes to be created for swimming pool coping, stairs and skirting boards.

## A STUNNING AND UNIQUE OLD WOOD LOOK

VINTAGE boards brilliantly reproduce the look of boards that have aged and developed a patina over time. The embossed material of the wood fibres gives a natural wood feel. Available in 2 widths and 3 colours, the Wengé, Lunar Grey and Graphite solid boards come in 2 different decors. The co-extrusion layer guarantees their colour for 20 years without fading. VINTAGE boards are designed to last with very low maintenance.

# BOSTON COMPOSITE FENCING

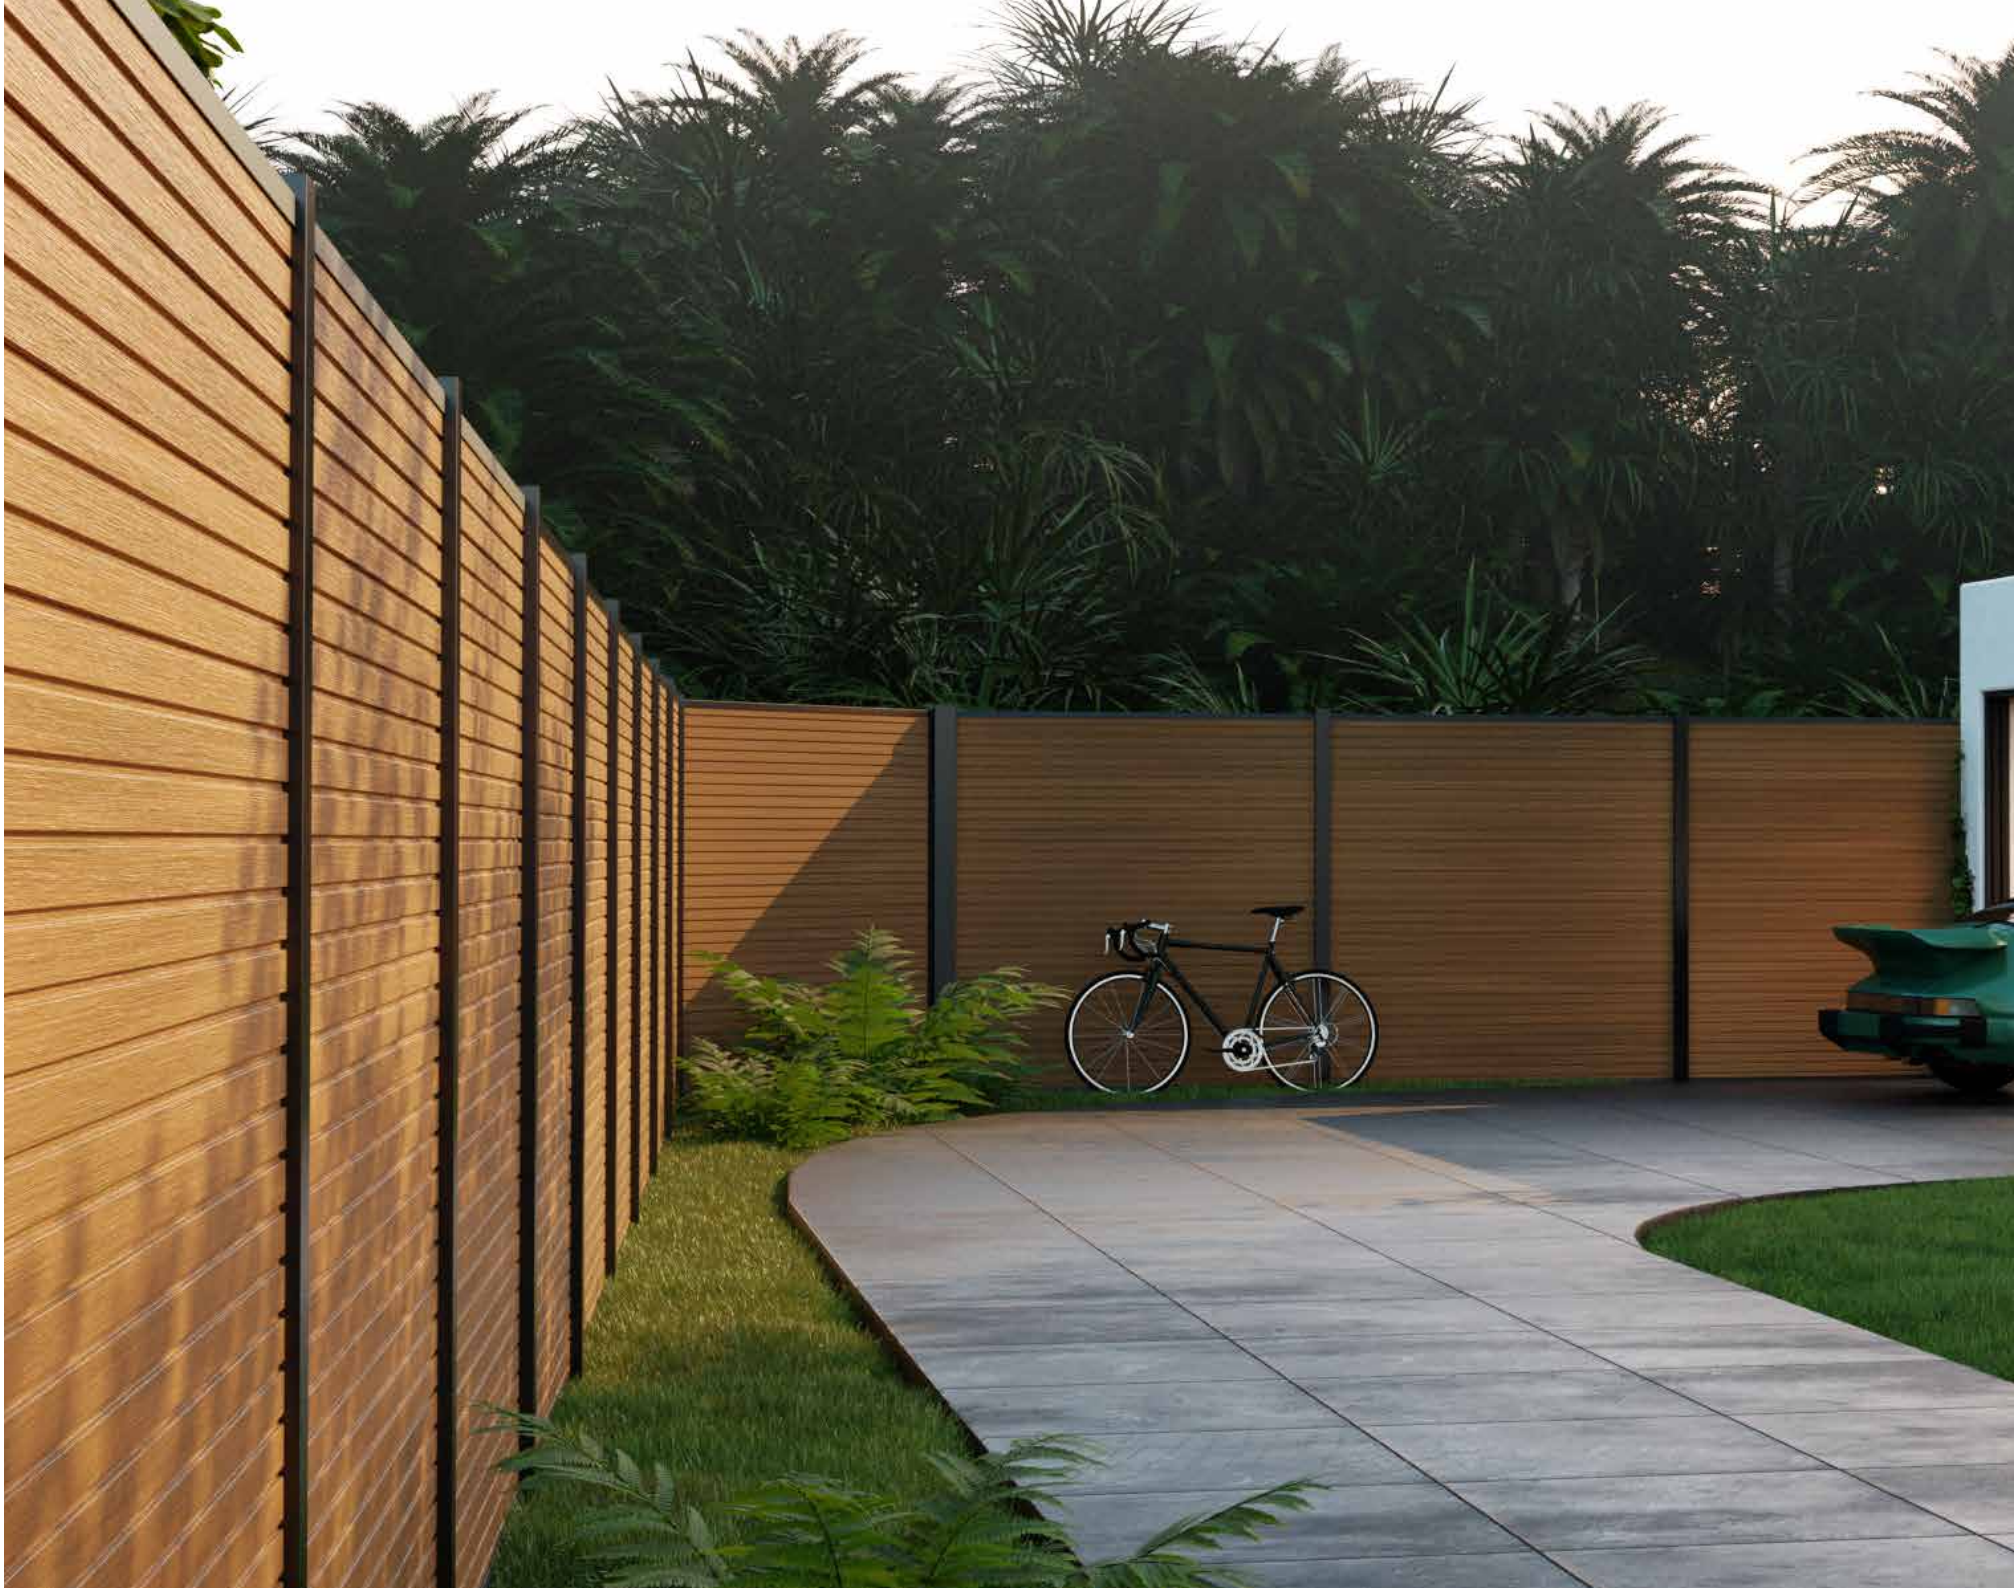

THE CONCEPT **Fiberdeck**<sup>®</sup>

# BOSTON

Boston is an ecosystem of products designed to adapt to your environment, needs and desires. The posts are fixed in the ground, on a slab or low wall and the fence is easily assembled by interlocking.

COMPOSITE

# MODERN

**Fiberdeck**<sup>®</sup>

The MODERN board's carefully calibrated grooves create an elegant faux-slat effect. These composite wood boards are guaranteed not to fade under the most extreme conditions, thanks to the co-extrusion process.

- *The board can also be stiffened with aluminium reinforcements.*
- *The corner kit is available to create a completely free contour.*

Dark Grey

**FD1118**

Teak

**FD1121**

Cedar

**FD1531**

*Modern Teak boards*

# PREMIUM

Resulting from extensive research and development, our Premium composite wood boards are protected against insects and termites. They are protected against UV rays and are therefore guaranteed for 20 years against fading and staining.

A thin polymer layer protects these boards across the entire surface to ensure a perfect seal.

• *These boards can also be stiffened with aluminium reinforcements.*

COMPOSITE

# CRIOS

**Fiberdeck**<sup>®</sup>

A breath-taking view with a geometric decor, for a moment that will remain frozen for eternity. Crios is a laser-cut aluminium decor with a pattern reminiscent of a giant set of bricks that lets light and landscape through while providing adequate privacy.

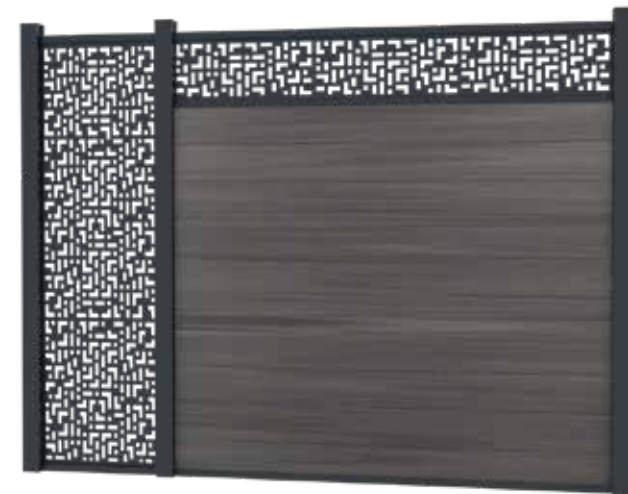

- *The perimeter frame elements ensure seamless integration and a perfect finish.*
- *A wall plate support that distributes forces evenly is also available for wall mounting without grouting or cracking.*

**CRIOS VERTICAL DECOR**  
H 1820 x L 584 mm  
**FD1214**

**CRIOS HORIZONTAL DECOR**  
H 300 x L 1750 mm  
**FD1213**

*Premium Dark Grey boards and Crios horizontal decors.  
Mounting on a wall plate support*

# HERA

**Fiberdeck**<sup>®</sup>

Featuring intertwined lines of varying thicknesses, the Hera decor is remarkably balanced and will look amazing in both urban and countryside settings.

The decors are provided with a grooved aluminium frame that fits perfectly on the aluminium or composite boards and in the rebates of the posts.

- *2 models to choose from: horizontal or vertical.*
- *The horizontal HERA decor replaces exactly 2 composite boards.*

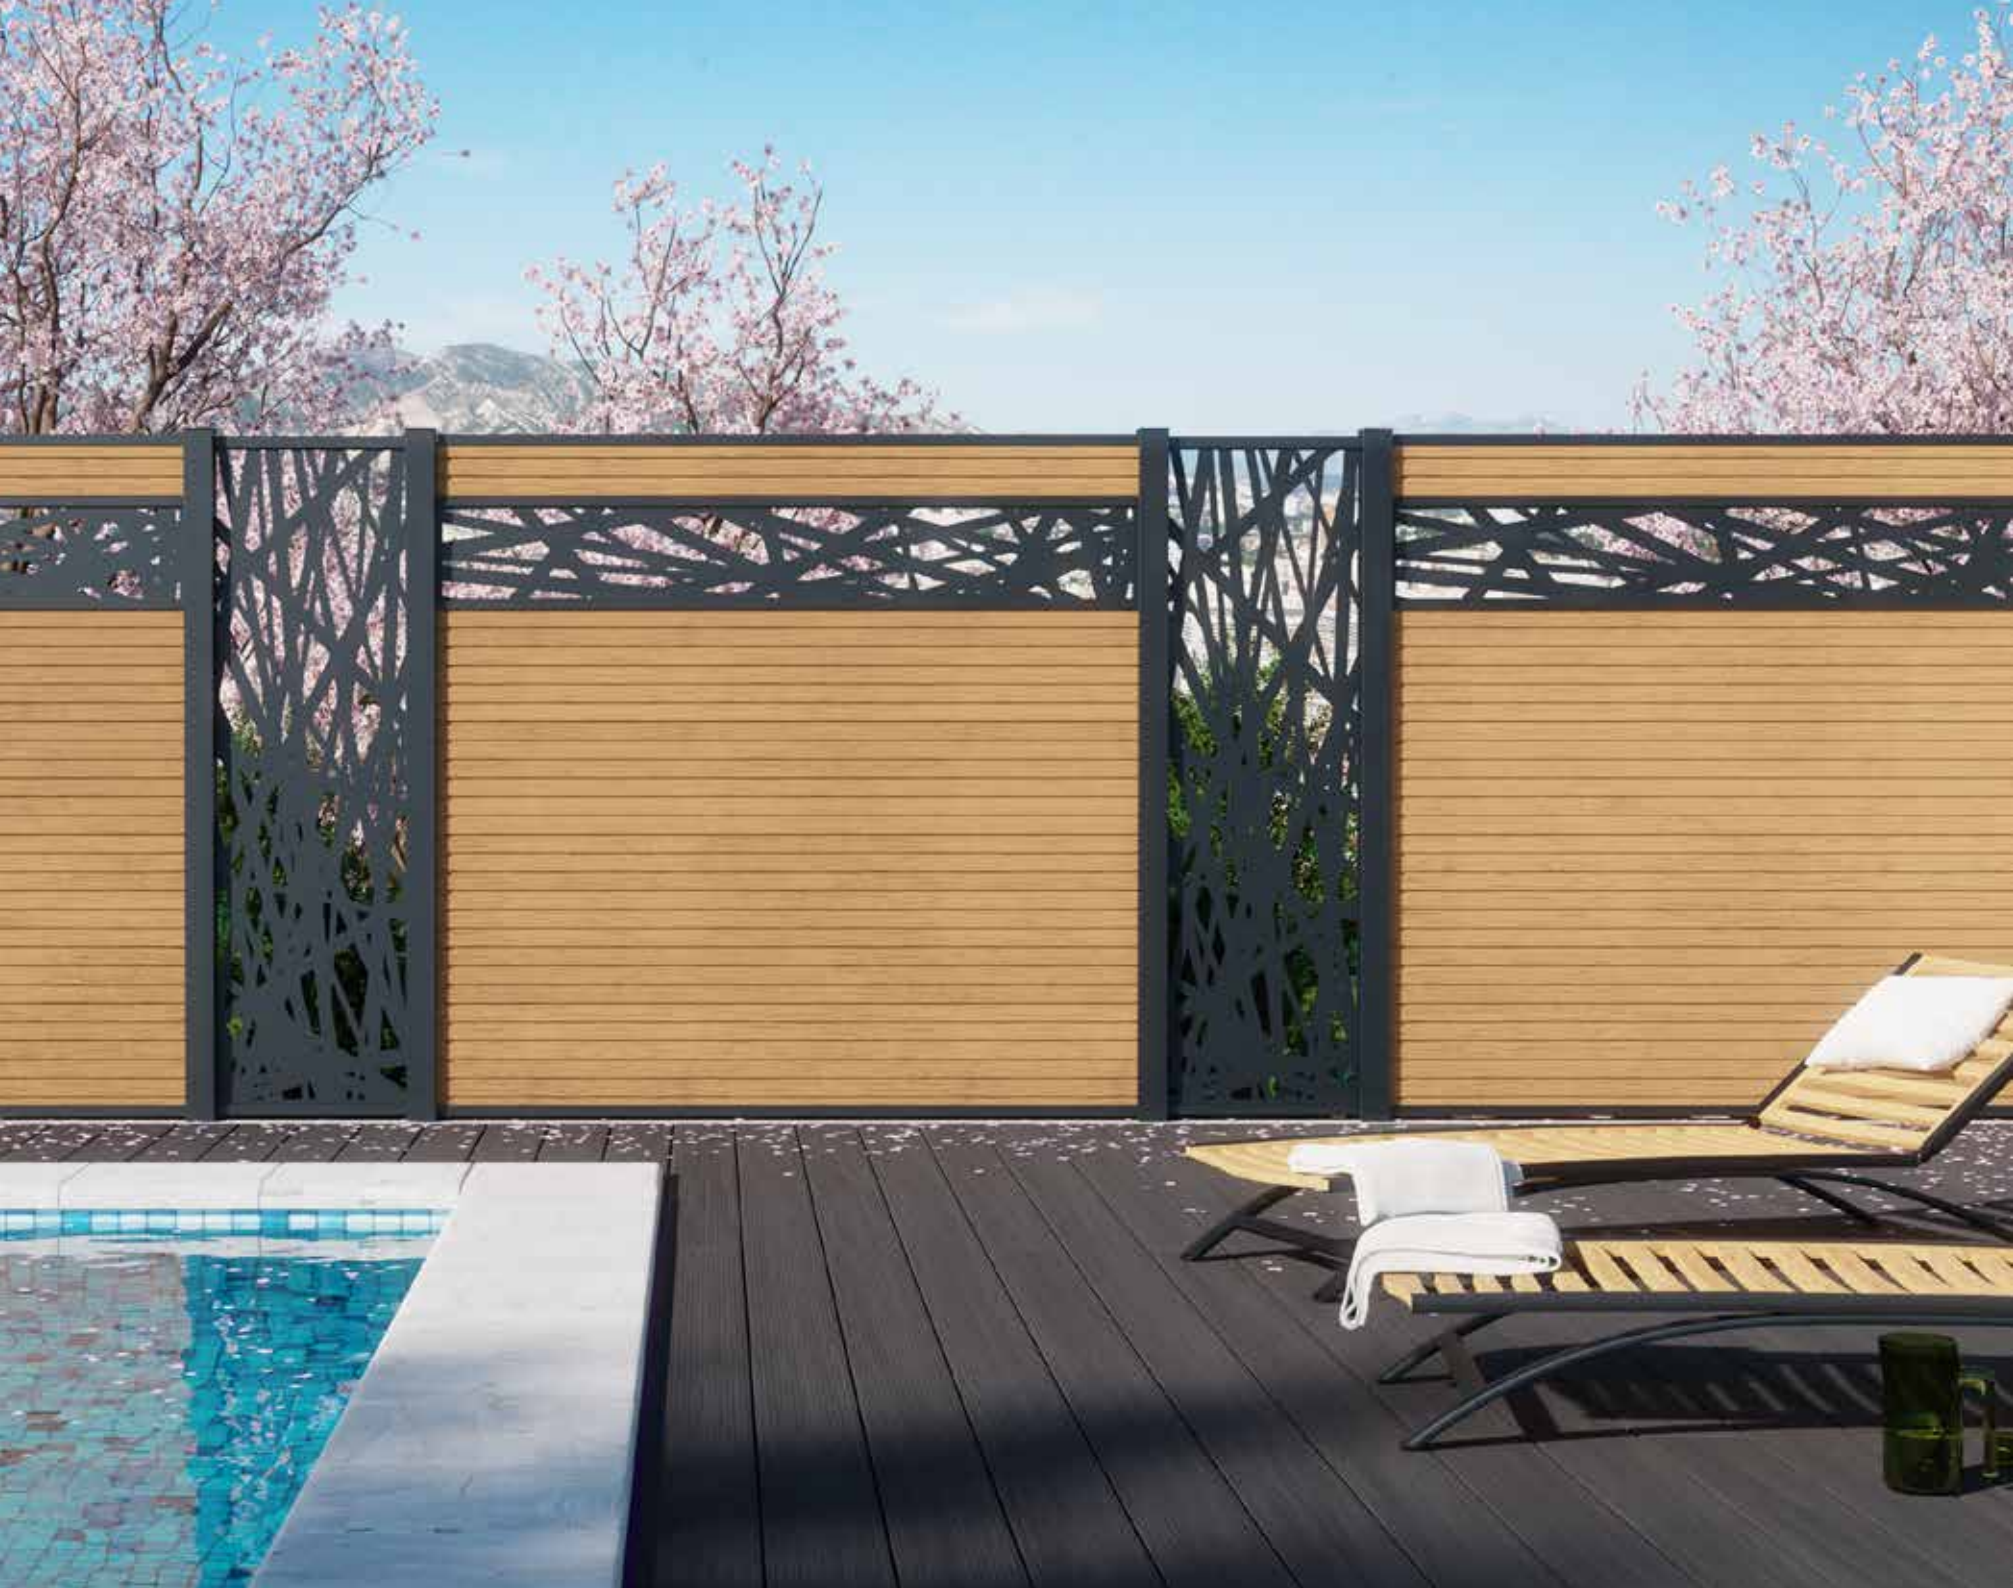

**HERA VERTICAL DECOR**

**FD1011**

**HERA HORIZONTAL DECOR**  
H 300 x L 1750 mm  
**FD1010**

*Modern Cedar boards and  
Hera horizontal/vertical decors*

# PAXOS

**Fiberdeck**<sup>®</sup>

Orange light breaks through the Paxos decors, forming a subtle and regular shadow play.

The 3mm-thick powder-coated decors are delivered with an aluminium frame, which is assembled on the aluminium or composite boards and in the posts.

- 2 models to choose from: horizontal or vertical.
- The horizontal PAXOS decor replaces exactly 3 composite boards.

**PAXOS VERTICAL DECOR**  
H 1820 x L 875 mm

**PAXOS HORIZONTAL DECOR**  
H 450 x L 1750 mm  
**FD1008**

*Premium Teak boards and Paxos vertical/  
horizontal decors*

# LAMIA

**Fiberdeck**<sup>®</sup>

A surprising moiré effect is achieved with the Lamia decor, reminiscent of foam on the sea, even in the middle of the desert. Thanks to its powder-coated aluminium structure, the Lamia collection is extremely durable.

- 2 models to choose from: horizontal or vertical.
- The horizontal LAMIA design replaces exactly 2 composite boards.

**LAMIA VERTICAL DECOR**

**FD1216**

**LAMIA HORIZONTAL DECOR**  
H 300 x L 1750 mm  
**FD1215**

*Premium Teak boards and Lamia  
vertical/horizontal decors*

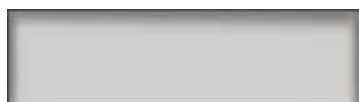

# CLARITY

**Fiberdeck**<sup>®</sup>

Clarity frosted glass panels allow light to pass through while maintaining adequate privacy.

8 mm-thick frosted glass panels can be combined with composite or aluminium boards to form modern and stylish filter panels.

**FROSTED GLASS PANEL**  
8 X 300 X 1780 mm **FD1218**  
8 X 450 X 1780 mm **FD1219**

*Premium light grey boards  
and 300 mm-high frosted glass panel*

# COMBO

**Fiberdeck**<sup>®</sup>

The Opale interlocking aluminium board can be combined with the Premium composite wood boards to form a Combo fence panel. The boards can be arranged in any order. The resulting contrast in colour and texture is highly sought after and will enhance the enclosed area.

ALUMINIUM

# ALUMINIUM

# OPALE

**Fiberdeck**<sup>®</sup>

This standard board is a must in our aluminium range and will delight those who are looking for a pure, uniform, sober fence that gives way to the very nature of the outdoor space. This board can be fitted with light fixtures to take advantage of the frame setting created by the fence.

It can also be combined with composite wood boards to create a warm contrast.

Aluminium  
RAL7016

*Opale aluminium boards  
and Open 45 boards with 15 mm wedges*

# OPEN 45

**Fiberdeck**<sup>®</sup>

The Open 45 mm aluminium board is distinctive and elegant. Ideal for low walls, it allows air to pass through, thus increasing wind resistance. Furthermore, it makes it possible to comply with town planning regulations while preserving privacy and aesthetic purity.

The Open 45 mm board can be combined with 15mm or 30mm wedges to achieve the desired spacing.

# FENCING COMPONENTS

INNOVATION

# CORNER KIT FOR ANGLE POST

The BOSTON fence corner kit allows you to set any angle in the fence line. The pivot pin is clipped into the rebate of the post and the pivot slides over it.

The swivel part holds the boards like a conventional post. It is possible to create angles from 10° to 170°.

The whole is held in position with the associated screws and closed with a specially designed cap.

**FD1338**

[fr.myfenceplanner.com](http://fr.myfenceplanner.com)

# ALUMINIUM

The aluminium boards as well as the posts and decors are powder coated (RAL7016) and Qualicoat and Qualmarine certified. Therefore they have excellent durability and good resistance to the elements. These boards can be combined harmoniously with the composite boards and decors to create structured patterns.

# AKIDO SIGHTSCREEN FENCING KIT IN COMPOSITE WOOD

## High-quality composite wood

Akido benefits from Fiberdeck's extensive know-how in the extrusion of high-quality composite wood. All our kits are guaranteed for 15 years (1). The slats are made of composite wood, which are very resistant to weather.

## Long-lasting colour with no fading

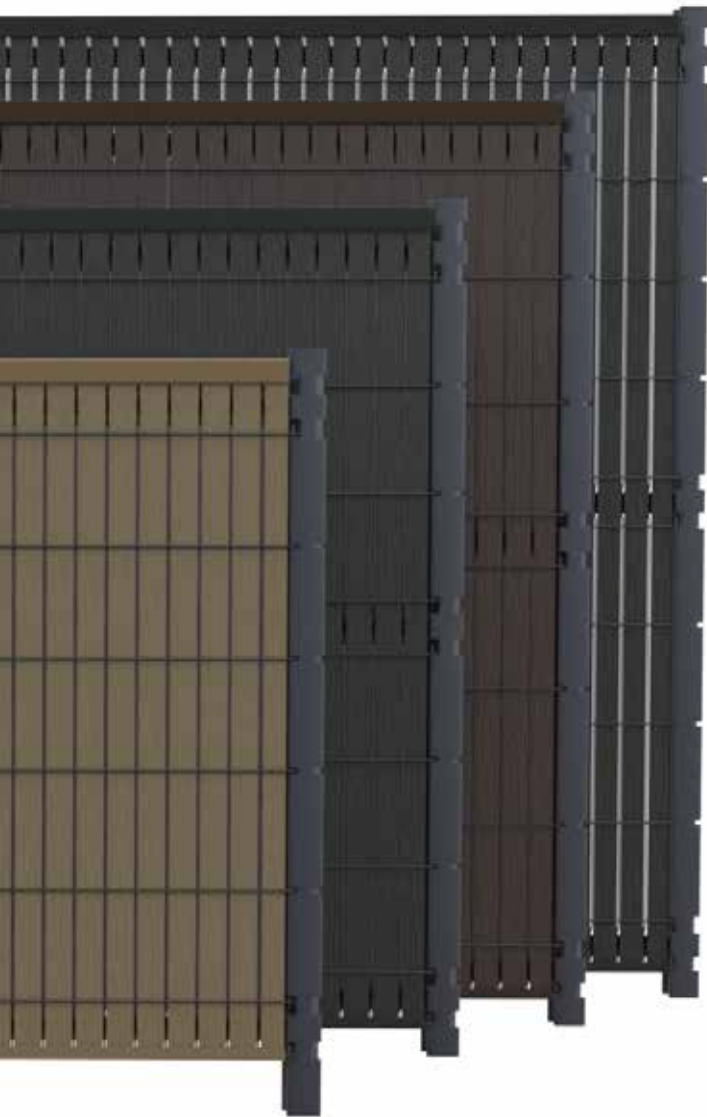

The composite wood is brushed, for a natural wood aspect. The colours are rich and can match any decor. Available in Anthracite, Brown and Sand.

## Quick and easy to install, no maintenance required

No staples, clips or screws. The elements slide in and the slats are clicked in and locked with the crossbars. Detailed instructions and a video can help guide you through the installation process.

(1) Learn more about Fiberdeck's limited guarantee on [www.fiberdeck.com](http://www.fiberdeck.com)

# WEO<sup>®</sup> CO-EXTRUDED COMPOSITE CLADDING

## Guaranteed against staining and fading

With years of experience and several million square metres marketed to date in a wide range of climates, we can guarantee our products for 20 years without any visible fading.

## Unique decors and striking colours

Our co-extruded boards provide a unique experience. Their outstanding technical and aesthetic properties insure complete peace of mind for the end user.

The boards feature a matt aspect, with intense and multi-chromatic colours. Each board is unique, as the manufacturing process allows for a wide range of random shades. Thus all installed projects blend harmoniously into their environment.

# WEO®

**Fiberdeck®**

## Biosourced cladding with unrivalled performance

WEO® cladding boards have been developed using the latest co-extrusion technologies to guarantee a fading-free product for 20 years while using 95% waste in its manufacture! A waterproof polyethylene film protects the wood from moisture absorption and stabilises the material. Furthermore, expansion is reduced to a minimum.

The mark of responsible forestry

# WEO® Classic

## A CLADDING BOARD WITH INTENSE AND BRIGHT COLOURS !

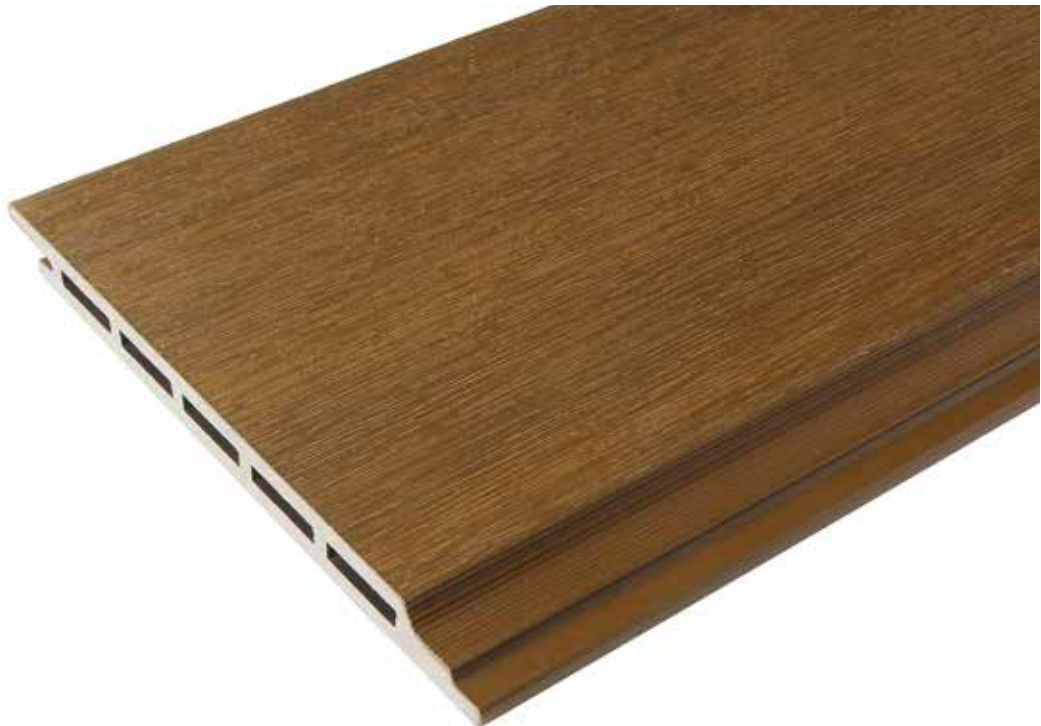

WEO® Classic cladding boards are available in 4 multi-coloured shades that are guaranteed against fading.

They confer a unique shine to your facade. The very durable brushed and matt surface beautifully imitates natural wood !

## A MODERN SLATTED DECOR

WEO® 60 cladding boards feature a slatted design and can be installed quickly horizontally or vertically. The 60mm-wide boards are evenly spaced 10mm apart. They are lightweight, stable and easy to install with our mounting system. These boards can also be combined with WEO® 35 and WEO® 60 profiles to create more variations, or paired with any other modern material.

## A SET OF WOODEN BOARDS FOR PROTECTION FROM THE SUN !

These composite wood sunshades offer effective protection from the sun. By adjusting the spacing between the boards, they allow shadows to play on the facade and provide excellent heat insulation. A unique and contemporary wood decor that does not age
